We're here for you!

When your pet is sick or injured, treatment usually begins with your local veterinarian – a skilled and highly trained doctor. Occasionally, their patients (your pets) require specialized care.

This is where ACCESS comes in! *Advanced Critical Care, Emergency and Specialty Services* provides advanced medical treatment and cutting-edge technology to vets and information to vets and pet owners.

With board-certified specialists in Avian & Exotics, Cardiology, Emergency & Critical Care, Internal Medicine, Interventional Radiology & Endoscopy, Nephrology, Neurology, and Surgery, as well as advanced-trained emergency doctors available around the clock, we are ready to provide compassionate and advanced medical care for your pets – 24 hours, 365 days a year.

TRAINING. TEAMWORK. TECHNOLOGY.

Advanced veterinary care requires specialized training and the most modern technology available. ACCESS believes this is the foundation of outstanding specialty care.

We also know cohesive teamwork between our doctors, medical technicians, support staff, and our referring veterinarians is vital to provide the best possible results.

So we work hard to ensure all links in the 'care chain' are continually measured and strengthened through ongoing education, acquisition of the best equipment, and committed action to client feedback.

OUR PLEDGE TO PET OWNERS

To always care for your pet as we would care for our own.

To be empathetic, compassionate, courteous, and respectful.

To provide your pet with the ideal treatment plan, and to always consult with you, or your vet, if other services or treatments are required.

To provide accurate reports to your vet in a timely manner.

To respect your relationship with us as a client, and recognize that your needs and concerns are important.

FOR EMERGENCIES

We are open 365 days a year. If you require emergency services, please contact your primary care vet first. If your vet is unavailable or you have been referred to ACCESS, it is helpful, but not necessary, to call ahead and inform us of your arrival.

Conveniently located in
Los Angeles
San Fernando Valley
South Bay*
Central Valley**

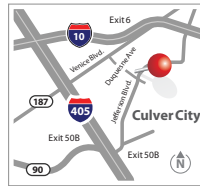

FOR NON-CRITICAL REFERRALS

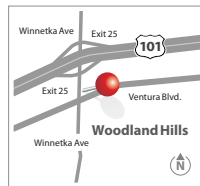

At ACCESS we provide appointments to see a specialist seven days a week. If you are calling for a referral, you may ask to speak with any of our specialty departments.

Our specialties include Avian & Exotics, Cardiology, Emergency & Critical Care, Internal Medicine, Interventional Radiology & Endoscopy, Nephrology, Neurology, Surgery, and Counseling.

If specialist care is needed after hours, please visit our ER Department where our capable staff will assess your pet and offer an appropriate specialist call if required.
