

# ACCESS

## Specialty Animal Hospitals

### Open Positions - Board-Certified Surgeons

Come join one of the largest, most advanced, compassionate, and progressive veterinary specialty referral groups in Southern California. We are looking for additional surgeons to join our successful and growing Surgery departments. ACCESS is currently comprised of emergency/critical care, cardiology, internal medicine, interventional radiology/endoscopy, surgery, nephrology, neurology, urology, and zoological medicine (avian and exotics). Each practice shares a facility with other independently owned and operated specialty practices allowing for direct collaboration with specialists in radiology, dentistry, dermatology, medical oncology and radiation oncology. We practice in a rich and rewarding environment where patient care can be optimized through the close working relationship between departments. This type of collaborative medicine is rare outside of a university setting.

Our surgery departments have a busy and varied caseload including a large number of soft tissue, orthopedic, neurologic, oncologic and interventional procedures.

To provide the best care possible, we stay apprised of new innovations, and utilize an extensive array of cutting-edge diagnostic, therapeutic, and monitoring equipment. These include a complete laboratory (CBC/Chemistry/Criticare Express-Nova/Istat/SCA2000, SnapDx, VetTest), monitoring devices (Cardell Max 12/Telemetry/NIBP/Invasive BP/telemetry), digital radiography, color flow Doppler ultrasound (GE Logiq S7, P6, Sonoscape portable ultrasound and Phillips CX50 cardiac ultrasound), OEC 9800 & 9900 fluoroscopy with neuro vascular package, 16 slice helical CT, and 1.5T MRI. We have pulmonetics critical care ventilators at each hospital. We are also equipped with complete endoscopic, laparoscopic, and thoracoscopic instrumentation. We routinely perform minimally invasive fracture fixation utilizing OEC 9800 and 9900 fluoroscopy. We're fully equipped to provide advanced orthopedic and soft tissue procedures and are equipped with Synthes locking bone plating equipment, TPLO and TTA instrumentation and external fixation devices We are also equipped with complete laser lithotripsy, endoscopic, arthroscopic, laparoscopic, and thoracoscopic instrumentation. We are always willing to expand in different directions and explore new therapies—this is supported and encouraged by our owner and administration team.

An ideal candidate will exemplify our guiding principles of Quality, Integrity, Compassion, and Service. They will have strong communication skills, an energetic attitude, empathy, and enthusiasm for helping both clients and patients. They will be committed to furthering their education, thereby providing the most advanced care to their patients. Additionally, they will excel at collaborating with their co-workers, our referring veterinarians, and our clients.

Essential job functions will be provided during the selection process. We offer excellent salary and benefits packages and travel compensation for your interview will be provided by ACCESS.

Please send your CV attention to our Chief of Staff, Richard Mills, DVM, DACVECC at [rmills@accessvets.com](mailto:rmills@accessvets.com).
